QualityGate

Kind: Interface

Source: `atloria-monorepo/libs/agent-core/src/autonomous/autonomous-loop.ts`

A quality gate is a concrete, measurable condition the agent must meet before it can consider the task done.

Domain layers define these; the autonomous loop checks and injects them.

Properties

Property	Type
<code>id</code>	<code>string</code>
<code>description</code>	<code>string</code>
<code>passed</code>	<code>boolean</code>
