Kind: Interface

Source: [atloria-monorepo/libs/agent-core/src/autonomous/setup-agent.ts](https://github.com/atloria-monorepo/libs/agent-core/src/autonomous/setup-agent.ts)

Setup Agent — Environment discovery and configuration sub-agent.

Runs in parallel with the main agent's initial investigation phase to detect the project language, runtime, package manager, and test command, then installs dependencies and runs a smoke test.

This module is fully self-contained — no local project imports.

Properties

Property	Type
os	string
shell	string
language	string
runtimeVersion	string
packageManager	string
activateCommand	string
depsInstalled	boolean
smokeTestPassed	boolean
warnings	string[]
projectDocs	string[]
testCommand	string
