---

## TechdocsCuration

---

**Kind:** Interface

**Source:** [atloria-monorepo/apps/api/src/technical-docs/curation.ts](https://github.com/atloria-monorepo/apps/api/src/technical-docs/curation.ts)

Curation (Phase 2.2): maintainers pin the entities readers should find first and hide internal noise (generated helpers, migration scaffolding). Stored per-project in `project.settings.techdocsCuration` and applied SERVER-SIDE when the snapshot is served, so the sidebar tree, the Cmd+K palette and any future consumer inherit it for free.

## Properties

| Property            | Type                  |
|---------------------|-----------------------|
| <code>pinned</code> | <code>string[]</code> |
| <code>hidden</code> | <code>string[]</code> |
