ToolDefinition

Kind: Interface

Source: `atloria-monorepo/libs/agent-core/src/runtime/types.ts`

Tool definition — domain layers define these as plain objects.
agent-runtime.ts converts them to SDK FunctionTool instances.

Properties

Property	Type
<code>name</code>	<code>string</code>
<code>description</code>	<code>string</code>
<code>parameters</code>	<code>Record<string, unknown></code>
<code>execute</code>	<code>(context: RunContext<TContext>, input: string) => Promise<string></code>
<code>timeoutMs</code>	<code>number</code>
<code>isConcurrencySafe</code>	<code>boolean</code>
<code>deferLoading</code>	<code>boolean</code>
<code>strict</code>	<code>boolean</code>
