VoidEmitter

Kind: Interface

Source: [atloria-monorepo/packages/editor/src/utils/voidEmitter.ts](https://github.com/atloria-monorepo/packages/editor/src/utils/voidEmitter.ts)

An emitter object that has a single subscription that will be executed.
The construct is used so that the lexical nodes can focus their React component editors.

Properties

Property	Type
<code>subscribe</code>	<code>(cb: () => void) => void</code>
