What is conduit

What conduit is

Conduit is a Vue 3 application that follows the RealWorld specification and provides a place to

share knowledge. Its Home screen is the starting point for browsing article feeds and popular tags.

If you need to...	Go to
Understand the wider capabilities	What can you do with conduit
Check setup and backend requirements	System requirements
Browse articles from Home	Discover articles
Open and read an article	Read an article
Choose a feed	Choose a feed
Understand what appears in the feed	Understand the Home results

Before you choose a feed

The Home screen changes its choices according to whether you are signed in. The personal feed is

available when you are authenticated; the public banner appears when you are not.

Prerequisites

- To use **Your Feed**, sign in first.
- To browse the public feed, open Home without signing in.

Choose a feed

Home offers **Global Feed**, **Your Feed**, and a tag feed.

Prerequisites

- To choose **Your Feed**, you are signed in.
- To choose a tag feed, you have a tag value available from Home.

Steps

1. Select one feed from the table.

If you want to...	Select
Browse all articles	Global Feed
Browse articles from accounts you follow	Your Feed
Browse articles associated with a tag	the tag value in the tag feed tab

Result: Home displays the selected feed.

When the following feed has no articles, Home displays the message

Your feed is empty. Go to the Global Feed to discover articles. Select

Go to the Global Feed to return to the public feed.

Understand the Home results

Use the selected feed to inspect article previews and popular tags. An article preview links

through its title, description, or **Read more...** text, while each popular tag value opens its

tag feed.

Prerequisites

- You can access Home and have selected a feed.

Steps

1. Open an article by selecting one of its links in the table.

If you want to...	Select
Open it from its heading or summary	the article title or description
Open it from the direct link	Read more...

2. Select a popular tag value to open that tag's feed.

3. Read `Loading articles...` while articles are loading.

4. If the loaded feed has no articles, read `No articles are here... yet. .`

5. If the feed has more than one page, select the number for the page you want.

Result: Home shows the selected feed page, an article preview, or the applicable loading or empty-feed message.
