

# Children

August 18, 2026

---

## Children

---

**Kind:** Constant

**Source:** `src/jsx/children.ts`

**Part of:** `Jsx`

## Definition

```
{
  map: (children: Child[], fn: (child: Child, index: number) => Child): Child[] =>
    toArray(children).map(fn),
  forEach: (children: Child[], fn: (child: Child, index: number) => void): void => {
    toArray(children).forEach(fn)
  },
  count: (children: Child[]): number => toArray(children).length,
  only: (_children: Child[]): Child => {
    const children = toArray(_children)
    if (child...
```

## Value

```
{
  map: (children: Child[], fn: (child: Child, index: number) => Child): Child[] =>
    toArray(children).map(fn),
  forEach: (children: Child[], fn: (child: Child, index: number) => void): void => {
    toArray(children).forEach(fn)
  },
  count: (children: Child[]): number => toArray(children).length,
  only: (_children: Child[]): Child => {
    const children = toArray(_children)
    if (child...
```
