

MESSAGE_MATCHER_IS_ALREADY_BUILT

August 18, 2026

MESSAGE_MATCHER_IS_ALREADY_BUILT

Kind: Constant

Source: `src/router.ts`

Error message indicating that a route cannot be added because the matcher is already built.

`MESSAGE_MATCHER_IS_ALREADY_BUILT` stores the error message used when code attempts to add a route after its matcher has been built. It keeps this validation message consistent within `src/router.ts` when route configuration occurs in the wrong order.

Definition

```
'Can not add a route since the matcher is already built.'
```

Value

```
'Can not add a route since the matcher is already built.'
```

Diagram

```
graph LR
  A[Add route] --> B{Matcher built?}
  B -- No --> C[Register route]
  B -- Yes --> D[MESSAGE_MATCHER_IS_ALREADY_BUILT]
  D --> E[Throw error]
```

Usage

```
import { MESSAGE_MATCHER_IS_ALREADY_BUILT } from "./router";

function addRoute(matcherBuilt: boolean) {
  if (matcherBuilt) {
    throw new Error(MESSAGE_MATCHER_IS_ALREADY_BUILT);
  }

  // Register the route before building the matcher.
}
```

AI Coding Instructions

- Use `MESSAGE_MATCHER_IS_ALREADY_BUILT` instead of duplicating the matcher-built error text.
- Check matcher build state before registering a new route.
- Add routes before the router builds its matcher.
- Keep errors related to route registration in `src/router.ts` aligned with this constant.
