upgradeWebSocket

Kind: Constant

Source: `src/adapters/deno/websocket.ts`

Part of: [Adapter](#)

Definition

```
UpgradeWebSocket<WebSocket, Deno.UpgradeWebSocketOptions>
```

Value

```
defineWebSocketHelper(async (c, events, options) => {  
  if (c.req.header('upgrade') !== 'websocket') {  
    return  
  }  
  
  // Echo the negotiated subprotocol back to the client. Browsers (e.g. Chrome)  
  // reject the connection when a subprotocol was requested but the response is  
  // missing the `Sec-WebSocket-Protocol` header.  
  const subprotocol = c.req.header('sec-websocket-protoco...
```

Relationships

- IMPORTS → `WSContext`
- IMPORTS → `defineWebSocketHelper`
