upgradeWebSocket

Kind: Constant

Source: `src/adapters/bun/websocket.ts`

Part of: [Adapter](#)

Definition

```
UpgradeWebSocket<any>
```

Value

```
defineWebSocketHelper((c, events) => {
  const server = getBunServer({
    upgrade<T>({
      req: Request,
      options?: {
        data: T
      }
    }): boolean
  })>(c)

  if (!server) {
    throw new TypeError('env has to include the 2nd argument of fetch.')
  }
  const upgradeResult = server.upgrade<BunWebSocketData>(c.req.raw, {
    data: {
      events,
      url: new URL(c.req.url),
      ...
    }
  })
})
```
