websocket

Kind: Constant

Source: <src/adapters/bun/websocket.ts>

Part of: [Adapter](#)

Definition

```
BunWebSocketHandler<BunWebSocketData>
```

Value

```
{
  open(ws) {
    const websocketListeners = ws.data.events
    if (websocketListeners.onOpen) {
      websocketListeners.onOpen(new Event('open'), createWSContext(ws))
    }
  },
  close(ws, code, reason) {
    const websocketListeners = ws.data.events
    if (websocketListeners.onClose) {
      websocketListeners.onClose(
        new CloseEvent('close', {
          code,
          reason,
          ...

```
