trimTrailingSlash

Kind: Function

Source: `src/middleware/trailing-slash/index.ts`

Part of: [Middleware](#)

Trailing Slash Middleware for Hono.

`trimTrailingSlash` creates Hono middleware that redirects requests whose path ends with a trailing slash to the equivalent path without it. It keeps route URLs consistent before the request continues through the application middleware and route handlers.

Signature

```
function trimTrailingSlash(options: TrimTrailingSlashOptions): MiddlewareHandler
```

Parameters

Name	Type
<code>options</code>	<code>TrimTrailingSlashOptions</code>

Returns: `MiddlewareHandler`

Diagram

```
graph LR
  Request[Incoming request] --> Middleware[trimTrailingSlash middleware]
  Middleware --> Check{Check{Path has trailing slash?}}
  Check -->|Yes| Redirect[Redirect to trimmed path]
  Check -->|No| Next[Continue to next middleware or route]
```

Usage

```
import { Hono } from 'hono'
import { trimTrailingSlash } from 'hono/trailing-slash'

const app = new Hono()

app.use(trimTrailingSlash())

app.get('/users', (c) => {
  return c.text('User list')
})

export default app
```

AI Coding Instructions

- Register `trimTrailingSlash()` before routes that should use normalized paths.
- Import the middleware from `hono/trailing-slash`.
- Keep route definitions without trailing slashes when this middleware is enabled.
- Do not add separate trailing-slash route variants unless they require different behavior.
