DecreasedTable

Kind: Class

Source: Pams/Web/Pams.WebApp/Client/app/models/common/decreased-table.model.ts (line 2)

Part of: [Pams](#)

`DecreasedTable` manages source and target currency symbol state for a decreased-value table model. Its methods reset symbols and handle currency-change events so related UI state can stay aligned with selected currencies.

Methods

Method	Signature	Returns
<code>resetFromSymobl</code>	<code>resetFromSymobl()</code>	<code>void</code>
<code>FromcurrencyChange</code>	<code>FromcurrencyChange(e: any)</code>	<code>void</code>
<code>TocurrencyChange</code>	<code>TocurrencyChange(e: any)</code>	<code>void</code>
<code>resetToSymobl</code>	<code>resetToSymobl()</code>	<code>void</code>

Properties

Property	Type
<code>ID</code>	<code>number</code>
<code>SupplierID</code>	<code>number</code>
<code>DecreasedTableSerial</code>	<code>number</code>
<code>FromValue</code>	<code>number</code>
<code>ToValue</code>	<code>number</code>
<code>FormCurrencyCode</code>	<code>string</code>

Property	Type
ToCurrencyCode	string
Percentage	number
_FromCurrencySymbol	string
_ToCurrencySymbol	string

Where it refuses work

- DecreasedTable stops the work with an early return when `this.ToValue == null` .
- DecreasedTable stops the work with an early return when `this._FromCurrencySymbol != ""` .
- DecreasedTable stops the work with an early return when `this._ToCurrencySymbol != ""` .

Diagram

```
graph LR
    UI[Currency selection UI] --> FromChange[FromcurrencyChange()]
    UI --> ToChange[TocurrencyChange()]
    FromChange --> Table1[Table]
    ToChange --> Table2[Table]
    ResetFrom[resetFromSymobl()] --> Table3[Table]
    ResetTo[resetToSymobl()] --> Table4[Table]
```

Usage

```
import { DecreasedTable } from './models/common/decreased-table.model';

const decreasedTable = new DecreasedTable();

// Handle source and target currency selection changes.
decreasedTable.FromcurrencyChange();
decreasedTable.TocurrencyChange();

// Reset currency symbol state when clearing the table or form.
decreasedTable.resetFromSymobl();
decreasedTable.resetToSymobl();
```

AI Coding Instructions

- Keep the existing method names and casing, including `Symobl` , when calling this class.
- Call `FromcurrencyChange()` and `TocurrencyChange()` from the matching currency selection handlers.
- Reset symbol state with `resetFromSymobl()` or `resetToSymobl()` when clearing related form state.
- Check connected components and templates before changing currency-state behavior.

Relationships

- IMPORTS → `AppSettings`

Used by

3 references from 3 files. Each is a place in this repository where the symbol is actually used — go read one rather than trusting an example.
