DecreasedTable

Kind: Class

Source: Frontend/src/app/models/common/decreased-table.model.ts (line 2)

Part of: Frontend

DecreasedTable stores the from/to symbol and currency state used by a decreased-table view or calculation flow. Its methods reset symbol values and react to currency changes for each side of the table.

Methods

Method	Signature	Returns
resetFromSymobl	resetFromSymobl()	void
FromcurrencyChange	FromcurrencyChange(e: any)	void
TocurrencyChange	TocurrencyChange(e: any)	void
resetToSymobl	resetToSymobl()	void

Properties

Property	Type
ID	number
SupplierID	number
DecreasedTableSerial	number
FromValue	number
ToValue	number
FormCurrencyCode	string

Property	Type
ToCurrencyCode	string
Percentage	number
_FromCurrencySymbol	string
_ToCurrencySymbol	string

Where it refuses work

- DecreasedTable stops the work with an early return when `this._FromCurrencySymbol != ""`.
- DecreasedTable stops the work with an early return when `this._ToCurrencySymbol != ""`.

    FromSymbol[From Symbol]
    FromCurrency[From Currency]
    ToSymbol[To Symbol]
    ToCurrency[To Currency]

    DecreasedTable -->|resetFromSymobl| FromSymbol
    DecreasedTable -->|FromcurrencyChange| FromCurrency
    DecreasedTable -->|TocurrencyChange| ToCurrency
    DecreasedTable -->|resetToSymobl| ToSymbol
```

Usage

```
const decreasedTable = new DecreasedTable();

// Reset selected symbols when the related currency changes.
decreasedTable.FromcurrencyChange();
decreasedTable.resetFromSymobl();

decreasedTable.TocurrencyChange();
decreasedTable.resetToSymobl();
```

AI Coding Instructions

- Preserve the existing method names, including `Symbol` and the current capitalization of currency-change methods.
- Call the matching reset method after changes that invalidate the selected from or to symbol.
- Keep from-side and to-side updates separate; use `FromcurrencyChange()` for from state and `TocurrencyChange()` for to state.
- Check component and service call sites before changing reset behavior, since these methods may clear dependent form state.

Relationships

- IMPORTS → `AppSettings`

Used by

4 references from 4 files. Each is a place in this repository where the symbol is actually used — go read one rather than trusting an example.
