NotificationsPage

Kind: Class

Source: Pams/Web/Pams.Web/Client/app/components/notifications/notificationsPage.ts (line 8)

Part of: Pams

NotificationsPage manages the notifications view in the PAMS web client. It loads user notifications, updates their state, switches notification tabs, and opens notification-related links or details.

Methods

Method	Signature	Returns
changeTabs	changeTabs(targetTab: undefined)	void
openLink	openLink(e: undefined, openDirect: boolean)	void
ngOnInit	ngOnInit()	void
open	open(ID: undefined, Type: undefined, index: undefined, notificationID: undefined, seen: undefined)	void
getUserNotifications	getUserNotifications(UserId: undefined)	void
updateUserNotifications	updateUserNotifications(NotificationId: undefined)	void

Properties

Property	Type
openedInPopup	boolean
tabsSwitch	string

Property	Type
notificationsData	any
subscription	Subscription

Diagram

```
graph LR
    User[User action] --> Page[NotificationsPage]
    Page --> Init[ngOnInit]
    Init --> Load[getUserNotifications]
    Page --> Tabs[changeTabs]
    Page --> Open[open]
    Page --> Link[openLink]
    Page --> Update[updateUserNotifications]
    Load --> Notifications[User notifications]
    Update --> Notifications
```

Usage

```
import { NotificationsPage } from './components/notifications/notificationsPage';

const page = new NotificationsPage();

page.ngOnInit();

page.changeTabs();
page.getUserNotifications();

page.open(notification);
page.openLink(notification);

page.updateUserNotifications();
```

AI Coding Instructions

- Call `getUserNotifications()` during initialization or after actions that can change notification state.
- Keep tab-selection behavior inside `changeTabs()` so notification filtering remains in one place.
- Route notification click handling through `open()` and external or linked navigation through `openLink()`.

- After marking notifications as read or changing their status, call `updateUserNotifications()` and refresh the displayed notification data.

Relationships

- IMPORTS → `Notifications`
- CALLS → `SytemNotificationController`

Used by

2 references from 2 files. Each is a place in this repository where the symbol is actually used — go read one rather than trusting an example.
