routerTransition

Kind: Constant

Source: Pams/Web/Pams.Web/Client/app/router.animations.ts (line 3)

Part of: [Pams](#)

Definition

```
trigger('routerTransition', [  
  transition('* <=> *', [  
    query(':enter, :leave', style({ position: 'fixed', width: '100%' }))  
    , { optional: true })),  
  group([  
    query(':enter', [  
      style({ transform: 'translateX(100%)' })),  
      animate('0.5s ease-in-out', style({ transform: 'translateX(0%)' })))  
    ], { optional: true })),  
  ...  
])
```

Value

```
trigger('routerTransition', [  
  transition('* <=> *', [  
    query(':enter, :leave', style({ position: 'fixed', width: '100%' }))  
    , { optional: true })),  
  group([  
    query(':enter', [  
      style({ transform: 'translateX(100%)' })),  
      animate('0.5s ease-in-out', style({ transform: 'translateX(0%)' })))  
    ], { optional: true })),  
  ...  
])
```
