AccountsController

Kind: Controller

Source: Pams/API/Pams.API/Controllers/Person/AccountsController.cs (line 23)

Part of: Pams

Where it refuses work

- AccountsController stops the work with an early return when `!isSaved` , in 2 places.
- AccountsController stops the work with an early return when `isSaved != Business.Entity.EnumNewSales.EnumReturnMessage.SavedSuccessfully` , in 2 places.
- AccountsController stops the work with an early return when `!isFound` , in 2 places.
- AccountsController stops the work with an early return when `account == null || !account.HasObject` .
- AccountsController stops the work with an early return when `p == null || !p.HasObject` .
- AccountsController stops the work with an early return when `model.CompanyBranchId != CompanyBranchID` .

When something fails

- AccountsController handles failure in 13 places: it turns it into a return value in all 13.
