Kind: Controller

Source: `Pams/API/Pams.API/Controllers/Sales/DeliveryTermController.cs` (line 19)

Part of: [Pams](#)

1 Where it refuses work

- `DeliveryTermController` stops the work with an early return when `success`, in 2 places.
- `DeliveryTermController` stops the work with an early return when `ModelState.IsValid`.
- `DeliveryTermController` stops the work with an early return when `logic.Exists(CompanyID, model.DeliveryTermID, model.Name)`.
- `DeliveryTermController` stops the work with an early return when `!logic.IsFound(CompanyID, ID)`.
- `DeliveryTermController` stops the work with an early return when `sourceElements == null || sourceElements.ImportModels == null || !sourceElements.ImportMo...`.
- `DeliveryTermController` stops the work with an early return when `dtArr == null || !dtArr.Any()`.

2 When something fails

- `DeliveryTermController` handles failure in 1 place: it turns it into a return value in all 1.

3 Relationships

- MODULE_DECLARES → `GetLookup`
