

FilesController

August 17, 2026

FilesController

Kind: Controller

Source: Pams/API/Pams.API/Controllers/Common/FilesController.cs (line 27)

Part of: Pams

Where it refuses work

- FilesController stops the work with `HttpResponseException` when `!Request.Content.IsMimeMultipartContent()` , in 2 places.
- FilesController stops the work with an early return when `!success` , in 6 places.
- FilesController stops the work with an early return when `!ModelState.IsValid` , in 4 places.
- FilesController stops the work with an early return when `httpRequest.Files.Count <= 0` , in 2 places.
- FilesController stops the work with an early return when `parentId == 0` , in 2 places.
- FilesController stops the work with an early return when `stProvider == null` , in 2 places.

When something fails

- FilesController handles failure in 20 places: it turns it into a return value in 18, and discards it silently in 2. A failure discarded silently leaves no trace for whoever debugs this later.

Relationships

- MODULE_DECLARES → `GetbyParentFileID_old`
- MODULE_DECLARES → `GetbyParentFileId`

- MODULE_DECLARES → GetLinkedFiles
- MODULE_DECLARES → GetTagsListByType
- MODULE_DECLARES → GetByID
