

PaymentMethodController

August 19, 2026

PaymentMethodController

Kind: Controller

Source: Pams/API/Pams.API/Controllers/Common/PaymentMethodController.cs (line 21)

Part of: [Pams](#)

Where it refuses work

- `PaymentMethodController` stops the work with an early return when `success` , in 2 places.
- `PaymentMethodController` stops the work with an early return when `!logic.IsFound(ID, CompanyID)` .
- `PaymentMethodController` stops the work with an early return when `!ModelState.IsValid` .
- `PaymentMethodController` stops the work with an early return when `logic.Exists(CompanyID, model.PaymentMethodID, model.Name)` .
- `PaymentMethodController` stops the work with an early return when `!logic.IsFound(CompanyID, ID)` .
- `PaymentMethodController` stops the work with an early return when `sourceElements == null || sourceElements.ImportModels == null || !sourceElements.ImportMo...` .

When something fails

- `PaymentMethodController` handles failure in 5 places: it turns it into a return value in all 5.

Relationships

- MODULE_DECLARES → `GetByID`
- MODULE_DECLARES → `GetByCompanyID`
