PersonController

Kind: Controller

Source: Pams/API/Pams.API/Controllers/Person/PersonController.cs (line 36)

Part of: Pams

Where it refuses work

- `PersonController` stops the work with an early return when `!isSaved` , in 3 places.
- `PersonController` stops the work with an early return when `!isFound` , in 3 places.
- `PersonController` stops the work with an early return when `isSaved` , in 3 places.
- `PersonController` stops the work with an early return when `!per.HasObject` , in 2 places.
- `PersonController` stops the work with an early return when `!success` , in 2 places.
- `PersonController` stops the work with an early return when `model.CurrentCredential == null || model.Departments == null || model.Departments.Count == ...` , in 2 places.

When something fails

- `PersonController` handles failure in 12 places: it turns it into a return value in 11, and logs it and continues in 1.
