

ProjectResponsiblesController

August 17, 2026

ProjectResponsiblesController

Kind: Controller

Source: Pams/API/Pams.API/Controllers/Sales/ProjectResponsibleController.cs (line 21)

Part of: Pams

Where it refuses work

- ProjectResponsiblesController stops the work with an early return when `!ModelState.IsValid` .
- ProjectResponsiblesController stops the work with an early return when `!PRLogic.SaveBulk(EntityList)` .

When something fails

- ProjectResponsiblesController handles failure in 5 places: it turns it into a return value in 4, and discards it silently in 1. A failure discarded silently leaves no trace for whoever debugs this later.

Relationships

- MODULE_DECLARES → GetByProjectID
- MODULE_DECLARES → SaveProjectResponsibles
- IMPORTS → BaseController
- IMPORTS → Project
- IMPORTS → Proc_ProjectResponsibleBindingModel
- IMPORTS → ProjectResponsible
- IMPORTS → ProjectResponsibleBindingModel
