RoleController

Kind: Controller

Source: Pams/API/Pams.API/Controllers/Security/RoleController.cs (line 23)

Part of: [Pams](#)

Where it refuses work

- `RoleController` stops the work with an early return when `isDublicate` , in 2 places.
- `RoleController` stops the work with an early return when `model != null` .
- `RoleController` stops the work with an early return when `!RLogic.IsAllowedToAddRoleAsPerSubscription(CompanyID)` .
- `RoleController` stops the work with an early return when `NewRole == null` .
- `RoleController` stops the work with an early return when `!success` .
- `RoleController` stops the work with an early return when `!Rol.HasObject` .

When something fails

- `RoleController` handles failure in 7 places: it turns it into a return value in all 7.
