Part of: [Pams](#)

.NET Library project (C#)

`Pams.Web` is a C# .NET library project in the Pams solution. It contains web-facing application code and connects client requests with shared Pams domain and service components.

Diagram

```

  Web --> Services[Pams Services]
  Services --> Domain[Pams Domain]
  Services --> Data[Data Access]
```

Usage

```
const response = await fetch("/api/pams", {
  method: "GET",
  headers: {
    Accept: "application/json",
  },
});

if (!response.ok) {
  throw new Error(`Request failed: ${response.status}`);
}
```

```
const data = await response.json();
console.log(data);
```

AI Coding Instructions

- Keep web request handling in `Pams.Web` ; place business rules in the relevant service or domain project.
- Follow existing C# project conventions for namespaces, dependency injection, and configuration.
- Do not expose data-access details directly from web endpoints.
- Check API route, request, and response contracts before changing JavaScript clients.

Relationships

- `DEPENDS_ON` → `Microsoft.ApplicationInsights.AspNetCore`
- `DEPENDS_ON` → `Microsoft.AspNet.SignalR.JS`
- `DEPENDS_ON` → `Microsoft.AspNetCore`
- `DEPENDS_ON` → `Microsoft.AspNetCore.Mvc`
- `DEPENDS_ON` → `Microsoft.AspNetCore.Server.IISIntegration`
- `DEPENDS_ON` → `Microsoft.AspNetCore.Server.Kestrel`
- `DEPENDS_ON` → `Microsoft.AspNetCore.SpaServices`
- `DEPENDS_ON` → `Microsoft.AspNetCore.StaticFiles`
- `DEPENDS_ON` → `Microsoft.Extensions.Configuration.Json`
