```
Project[Pams/HelperTool/HelperTool.csproj] --> Package[FastMember.Signed NuGet package]
Package --> Restore[NuGet restore]
Restore --> Build[HelperTool build]
Build --> Runtime[HelperTool runtime]
```

Usage

```
import { readFile } from "node:fs/promises";

const projectFile = "Pams/HelperTool/HelperTool.csproj";
const projectXml = await readFile(projectFile, "utf8");

const hasFastMemberSigned =
  /(?:Include|Update)="FastMember\.Signed"/.test(projectXml);

if (!hasFastMemberSigned) {
  throw new Error("FastMember.Signed is not declared in HelperTool.csproj");
}
```

```
console.log("FastMember.Signed dependency is declared.");
```

AI Coding Instructions

- Keep the `FastMember.Signed` package declaration in `Pams/HelperTool/HelperTool.csproj` .
- Restore NuGet packages before building the HelperTool project.
- Do not replace `FastMember.Signed` with a differently named FastMember package without checking signed-package requirements.
- Check project-file dependency declarations when resolving missing FastMember types or build errors.
