

Google.Apis

August 17, 2026

Google.Apis

Kind: Service

Source: Pams/Logic/Pams.Storage/Pams.Storage.csproj (line 1)

Part of: Pams

NuGet package dependency

`Google.Apis` is a NuGet package dependency declared by `Pams.Storage`. It supplies Google API client library types that storage code can reference when interacting with Google services.

Diagram

```
flowchart LR
    Storage["Pams.Storage"] --> Project["Pams.Storage.csproj"]
    Project --> Package["Google.Apis NuGet package"]
    Package --> GoogleServices["Google API client libraries"]
```

Usage

```
import { execFileSync } from "node:child_process";

const projectFile = "Pams/Logic/Pams.Storage/Pams.Storage.csproj";

const packages = execFileSync(
    "dotnet",
    ["list", projectFile, "package"],
    { encoding: "utf8" },
);

if (!packages.includes("Google.Apis")) {
    throw new Error("Google.Apis is not declared for Pams.Storage.");
}
```

```
console.log("Google.Apis dependency is available to Pams.Storage.");
```

AI Coding Instructions

- Keep `Google.Apis` dependency changes in `Pams.Storage.csproj` .
- Confirm package changes with `dotnet list Pams/Logic/Pams.Storage/Pams.Storage.csproj package` .
- Use Google API client types from the .NET storage project, not directly from TypeScript code.
- Check existing package declaration format before changing package metadata.

Used by

1 reference from 1 file. Each is a place in this repository where the symbol is actually used — go read one rather than trusting an example.
