System.Web.WebPages

Kind: Service

Source: Pams/Logic/Pams.Business/Pams.Business.csproj (line 1)

Part of: Pams

NuGet package dependency

`System.Web.WebPages` is a NuGet package dependency declared in `Pams.Business.csproj`. It supports legacy ASP.NET Web Pages components that may be required by code or transitive dependencies in the Pams business project.

    participant NuGet as NuGet Restore
    participant WebPages as System.Web.WebPages
    participant App as ASP.NET Application

    Build->>Csproj: Read package dependency
    Csproj->>NuGet: Restore System.Web.WebPages
    NuGet->>WebPages: Resolve package assembly
    WebPages->>App: Support legacy Web Pages dependencies
```

Usage

```
// Client code can call an application endpoint backed by legacy ASP.NET components.
async function loadPageContent(path: string): Promise<string> {
    const response = await fetch(path);

    if (!response.ok) {
        throw new Error("Unable to load page content.");
    }
}
```

```
return response.text();
}

loadPageContent("/legacy/page")
    .then((html) => {
        document.body.innerHTML = html;
    })
    .catch((error) => {
        console.error(error);
    });
```

AI Coding Instructions

- Treat `System.Web.WebPages` as a legacy NuGet dependency declared by `Pams.Business.csproj`.
- Check for Web Pages, Razor, or ASP.NET dependencies before removing or updating this package.
- Keep package changes compatible with the project's legacy project-file format.
- Restore NuGet packages after changing package references and verify dependent projects still build.
