

Stock by shipment

September 11, 2026

Stock by shipment

Use the warehouse stock views to read quantities by shipment or by product, then adjust the columns and filters shown in the list.

Stock views for warehouse work

Stock views are reference lists for checking inventory after warehouse receiving and inspection

work. **Stock By Shipment** groups the view around incoming shipment information;

Stock By

Products groups it around products.

If you need to...	Go to
Read quantities, locations, and stages tied to incoming stock	Stock By Shipment
Read stock grouped by product	Stock By Products
Review receiving work before checking stock	Goods receipt notes
Review inspection work before checking stock	Incoming inspection notes
Follow the wider warehouse sequence	Warehouse fulfillment flow

The warehouse list also includes **Receiving**, **Stock By Shipment**, and **Stock By Products**.

Before you start

Prerequisites

- Have access to the Warehouse list.
- Have a saved list layout available for the view.
- Know whether you need shipment-oriented or product-oriented stock information.

The list controls appear only when the relevant subscription and list settings allow them. The grid appears after its list layout is available.

[!NOTE]

Your saved layout determines which headers you see. Read the headers currently displayed rather than relying on a fixed column order.

Find a stock view

Open a stock reference list from the Warehouse tabs.

Prerequisites

- You can access the Warehouse list.

Steps

1. Open the Warehouse list.
2. Select one option from the table.

If you need to...	Select or open
Check stock connected to incoming shipments	Stock By Shipment
Check stock grouped by product	Stock By Products

Result: The selected list opens with its active tab and the headers provided by its saved layout.

Compare the two stock views

Stock By Shipment is the list for reading each stock row against its shipment-related information. Its displayed headers are grouped below.

Stock detail	Headers
Product and quantity	Product , Description, Qty, Qty (available) , Unit
Placement	Area, Location
Inspection and status	Inspection no., GRN, Stage

Tickets

The list toolbar shows **Refresh**, **Table Layout**, and **Settings**.

Adjust the displayed view

Use this read-only procedure to inspect the available layout and list settings without changing a saved layout or applying a filter.

Prerequisites

- Open either stock list.
- Confirm that **Table Layout** or **Settings** is visible in the toolbar.

Steps

1. Select **Table Layout**.
2. Read the available layout choices.

If you need to...	Select or read
Identify the current standard choice	Standard Layout
Start a new layout	Save New Layout
Enter the name for a new layout	Layout name
Change the current saved layout	Update Current
Remove the current saved layout	Delete Current
Review column choices	Columns Chooser
Expand columns to fit their contents	Expand column width

The layout menu also provides the controls for creating or removing a saved layout. **Save New**

Layout opens the layout-name form. **Save** stores the new layout. **Cancel** closes the form.

Delete Current opens the delete-layout submenu. **Delete** removes the selected layout.

Cancel closes the submenu.

3. Select **Settings**.
4. Read the available list settings.

If you need to...	Select or read
Open export options	Export

the grid continue to follow the saved layout.

When a view or control is unavailable

Use the table below when a list opens with fewer controls or different headers.

What you see	What it means	What to do
The grid has no fixed set of headers	The displayed columns come from the saved list layout.	Work from the headers currently shown in the grid.
The search panel is not shown	Search is not available through the list's search panel.	Use the headers and list controls that are visible.
The grid's column chooser is unavailable	The grid-level column chooser is disabled, although the layout menu can show Columns Chooser .	Use the saved layout that is already active.
Import is unavailable	Import is not an available list action.	Use the list for reference.
A product row has no edit link	The product list does not provide an active edit link in its action column.	Use the stock view for reference.

When a layout operation reports a message, match the exact text below to the operation you were using:

Operation or condition	Message
Loading list layouts	Couldnt Load Table Layouts
Entering a layout name already in use	Duplicate Layout Name
Saving a new layout	Layout saved Successfully
Updating a saved layout	Error Saving Layout
Trying to change the standard layout	You can't change the standard layout.. please, create new layout
Trying to modify the default layout	Default Layout Cannot be modified
Trying to delete the default layout	Default Layout Cannot be deleted
Deleting a saved layout	Data Deleted Successfully
Deleting a layout when the delete operation fails	Error Deleting the Layout
Loading the default layout	Couldnt Load Default Layout

Operation or condition	Message
Saving a new layout when its save error path reports a failure	Error Saving Layout
Setting the current layout when its error path reports a failure	Error setting current layout

Know what to do next

The stock lists are reference surfaces. Continue with the page that owns the next warehouse task:

- [Goods receipt notes](#) for receiving work.
- [Incoming inspection notes](#) for inspection work.
- [Goods issue notes](#) for issuing goods.
- [Delivery notes](#) for delivery work.
- [Upcoming stock](#) for stock that is still upcoming.
- [Personalizing your workspace](#) for broader workspace layout choices.
