

Upcoming stock

September 10, 2026

Upcoming stock

Upcoming stock

Upcoming stock is the Inventory destination for reviewing products as they move from receipt through inspection and toward storage.

If you need to...	Go to
Choose the warehouse queue	Find the Upcoming stock list
Read the columns and toolbar	Read the Upcoming stock list
Review both queue routes	Choose the queue to review
Handle a stocking action	Handle the conditional Stock product action
Continue from receipt work	Goods receipt notes
Continue from inspection work	Incoming inspection notes
Review Quality Control work	QC
Review another stock view	Stock by shipment

The page provides two queues: **Awaiting Inspection** and **Awaiting Storage**.

Awaiting

Inspection is the received-but-not-inspected list. **Awaiting Storage** is the Quality-Control-released list.

Before you start

Your access, saved list layout, and available rows determine what appears on Upcoming stock and which controls are available for each row.

Prerequisites

- Have access to the Inventory area.
- Open **Inventory > Upcoming stock**.
- Use a row whose product is eligible for stocking when you need the **Stock product** action.
- Have the storage area and position ready before you save stocking details.

The list requires a saved layout selection before its grid appears. If the subscription does not include this surface, the page follows its subscription branch instead of showing the list.

The stocking action also requires a row that meets the product's stocking condition.

Find the Upcoming stock list

Reach the Inventory destination, then choose the queue that contains the products you need to review.

Prerequisites

- Have access to the Inventory area.

Steps

1. Open the Inventory area.
2. Select **Upcoming stock**.
3. Select the queue that matches the work you need to review.

If you need to...	Select
Review products awaiting inspection	Awaiting Inspection
Review products awaiting storage	Awaiting Storage

Result: The selected Upcoming stock queue is open.

Read the Upcoming stock list

The Upcoming stock list shows warehouse rows with receipt, quantity, unit, stage, and inspection references. The visible list uses these headers:

Header	What to use it for
Sales job no.	Identify the related sales job.
Product	Identify the product.
Description	Read the product description.
Area	Read the displayed area.
Position	Read the displayed position.
P.O.s	Read the purchase-order reference.
Received Qty	Read the received quantity.
Accepted qty	Read the accepted quantity.
Rejected qty	Read the rejected quantity.
Unit	Read the quantity unit.
Stage	Read the current displayed stage.

Header	What to use it for
GRN	Read the goods-receipt reference.
Inspection No.	Read the inspection reference.

The list also presents the toolbar controls **Refresh**, **Table Layout**, and **Settings**. When your saved layout includes **Table Layout** choices, use the headers and rows currently visible in your list because the saved layout changes which columns are shown.

Choose the queue to review

Compare the inspection and storage queues by selecting each queue and reviewing its list.

Prerequisites

- Have the Upcoming stock list open.

Steps

1. Select the queue that matches the work you need to review.

If you need to...	Select	Destination
Review products awaiting inspection	Awaiting Inspection	Upcoming stock list
Review products awaiting storage	Awaiting Storage	Awaiting Storage list

2. Review the list headers and rows.

1 2 3 > Tickets

Result: The queue matching the warehouse stage is open, with its list headers and rows available for review.

Handle the conditional **Stock product** action

Select **Stock product** to assign an eligible product to storage. The control appears only for eligible rows.

The row must have a receiving shipment, an inspection, and a release to Inventory, and it must have no rejected quantity before **Stock product** is rendered.

Prerequisites

- Have an eligible row in the Upcoming stock list.
- Have the storage area and position to enter.

The stocking details use **Areas**, **Position**, **Stocked By**, and **Stocked On**.

The storage destination is selected through **Areas** and **Position**. **Stock Type** uses these

choices: Available for sale , Received for PM , Rejected , Maintenance , and Reserved for PM . The available **Areas**, **Stocked By**, and **In Stock** entries depend on the current list data.

Selecting **Stock product** opens the **Product assignment certificate** popup. The popup

requires **Position**. The popup uses **OK** to submit the stocking entry.

When the entry saves, Upcoming stock refreshes and the popup closes.

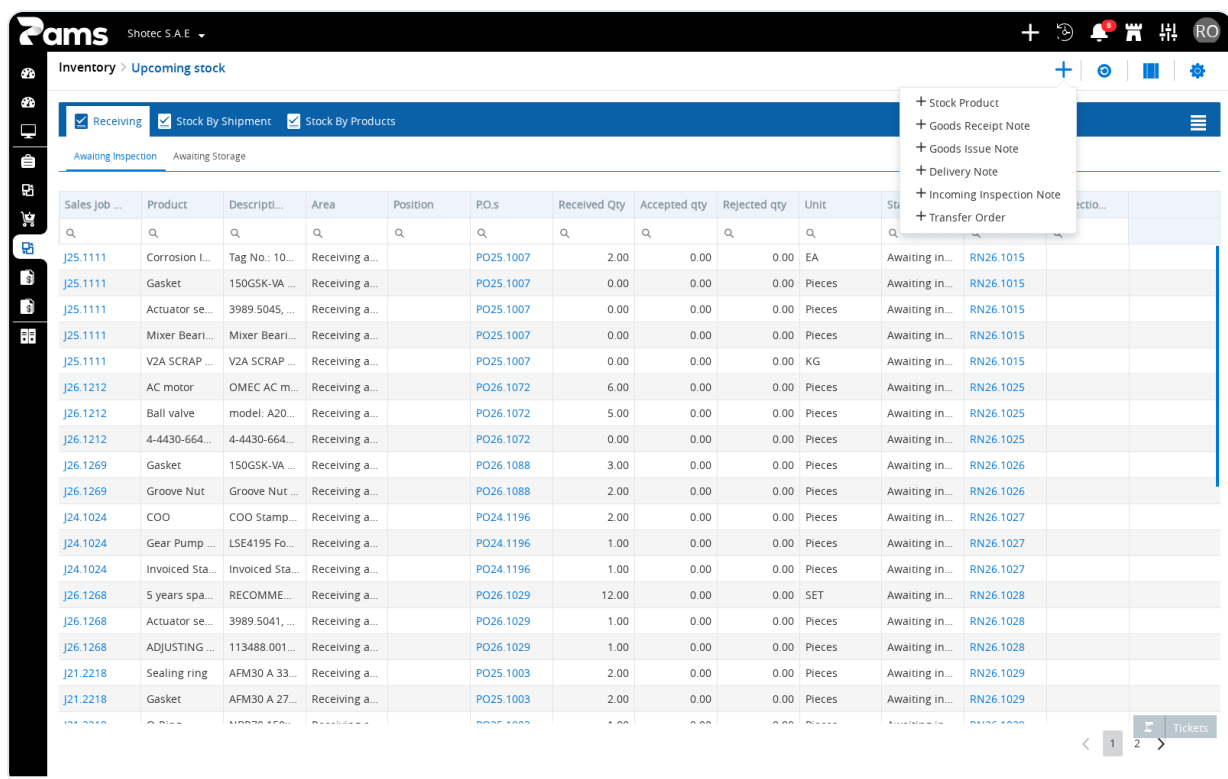

Steps

1. In an eligible row, select **Stock product**.
2. Enter or select the storage area in **Areas**.
3. Enter the storage position in **Position**.

Before submission, choose one outcome:

If you want to...	Select	Outcome
Save the stocking entry	OK	Upcoming stock refreshes and the popup closes.
Cancel without saving	Don't Save	The popup closes without saving.

4. Select the control that matches your chosen outcome.

Result: Selecting **OK** saves the stocking entry, refreshes Upcoming stock, and closes the popup. Selecting **Don't Save** closes the popup without saving.

When the list or action does not work

Use the message text below to correct the stocking entry or identify the owning warehouse flow.

What you see	What it means	What to do
Your request was completed successfully	The request completed successfully.	Continue with the updated warehouse work.
An error occurred while processing your request	The request could not be processed.	Check the values in the stocking form and try the action again.
Please enter the storage area and position for each product	A product lacks a storage area or position.	Complete Areas and Position for each product.
Position is required	A required position is empty.	Enter a value in Position .
Package products cannot be empty	The product package has no products.	Return to the product details and add the required product before

What you see	What it means	What to do
		saving.
Forbidden characters detected. Please remove them and try again.	The entered value contains a forbidden character.	Remove the forbidden character and retry the action.

If PAMS displays `Please enter the storage area and position for each product`, enter a **Position** before selecting **OK** again.

If **Stock product** is not available on a row, review another row in the queue. The action depends on the product's eligibility.

Messages for receiving-shipment, inspection, shared-file, and amendment-order work belong to their owning flows: [Goods receipt notes](#), [Incoming inspection notes](#), and [Libraries](#).

Result: You have either corrected the displayed stocking message or identified the warehouse flow that owns the message.

What comes next

After reviewing **Awaiting Inspection**, continue with [Incoming inspection notes](#).
 After reviewing **Awaiting Storage**, continue with [QC](#) when the next task concerns quality-control release. For receipt work, use [Goods receipt notes](#).
 For another stock view, use [Stock by shipment](#).

The detail surface can also lead to **Comments**, **Receiving sheet**, **Inspection sheet**, **Transfer history**, and **Last Modifications** when warehouse details have an ID.
