Contract Data — Overview

Applications > Contract Data

Overview

Contract Data provides a central area for viewing and working with contract-related information in the application. It is intended for users who need to review or maintain contract records that support commercial, project, purchasing, and financial activities.

Sales representatives, project managers, purchasing officers, and finance users can use this area when contract information is relevant to sales jobs, buyouts, supplier commitments, customer arrangements, or job profitability review.

The area also supports configurable list layouts, allowing users to adjust how contract data is displayed for their operational responsibilities.

What you can do here

- **Update (icn-update)** the displayed contract data.
- Use **Layout (icn icn-layoout)**, **Standard Layout**, and **Add Layout** to select or create a data layout.
- Use **Save**, **Update Current**, **Delete Current**, **Delete**, or **Cancel** to manage layout changes.
- Use **Columns Chooser** to choose the columns displayed in the contract data view.
- Use **Settings (icn icn-settings)** to access display settings.
- Use **Export** to export the displayed contract data.
