Dashboard — Overview

User Guide › Dashboard

Overview

The Dashboard provides an at-a-glance view of operational information across the business. It supports day-to-day monitoring by presenting dashboard records and related information in one central area.

Sales representatives, sales managers, purchasing officers, warehouse managers, project managers, and finance officers can use the Dashboard to review current operational data relevant to their work. The area includes Dashboard and DevExtreme Dashboard views, as well as ticket-related information.

What you can do here

- Use **Select** to choose the dashboard information to review.
- Open **Tickets** to review ticket-related information from the Dashboard.
