Help & Troubleshooting — Inventory

Help and Troubleshooting > Inventory

Inventory

Symptom	Likely cause	Fix
You cannot enter the Inventory workspace.	The access screen requires credentials.	Complete Enter User Name and Enter Password , then select Login .
A required field is not visible in the Warehouse list.	The current layout does not include that column.	Select Columns Chooser , add the required column, then use Update Current or create a layout with Add Layout and Save .
The displayed stock view does not answer the question.	The current view is not aligned with the required perspective.	Select Goods Receipt , Stock (By Shipment) , or Stock (By Product) as appropriate.
An unwanted layout remains available.	The layout has not been removed.	Select Delete Current for the active layout, or use Delete where a selected layout item is presented for deletion.
