All

Overview

The **All** view in Market provides a consolidated workspace for reviewing market-related records by tab. Sales representatives, account managers, project managers, purchasing officers, and finance users can use it to review account managers, Accounts, principals, and sub-suppliers, then adjust the list layout to support their daily review.

Use this view when you need to locate a market record, review its displayed information, save a reusable column arrangement, or export the currently displayed list.

Settings

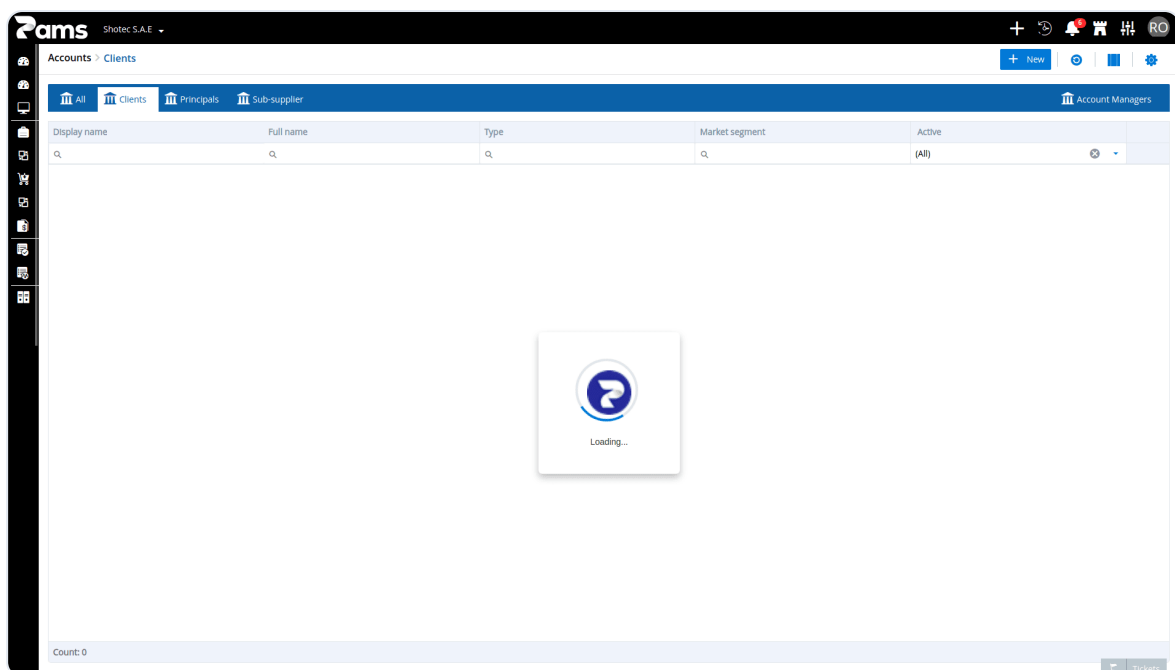

Before working with the list regularly, set up a layout that displays the information relevant to your role. Layout settings affect how the list is presented; they do not create or change the market records shown in the tabs.

Setting or control	Purpose
Standard Layout	Returns the list to the standard layout.
Select...	Selects an available layout.
Layout name	Enter a name for a layout you want to save.
Add Layout	Starts the process of adding a layout.
Save	Saves the layout configuration.
Update Current	Updates the currently selected layout.
Delete Current	Removes the currently selected layout.
Columns Chooser	Opens the column selection control for the list.
files[]	Displays the files field available on the screen. No processing behaviour is specified on this view.

Note: Use a clearly descriptive **Layout name**, such as “Account Review” or “Supplier Review,” so that users can identify the appropriate list arrangement when selecting a layout.

Workflow

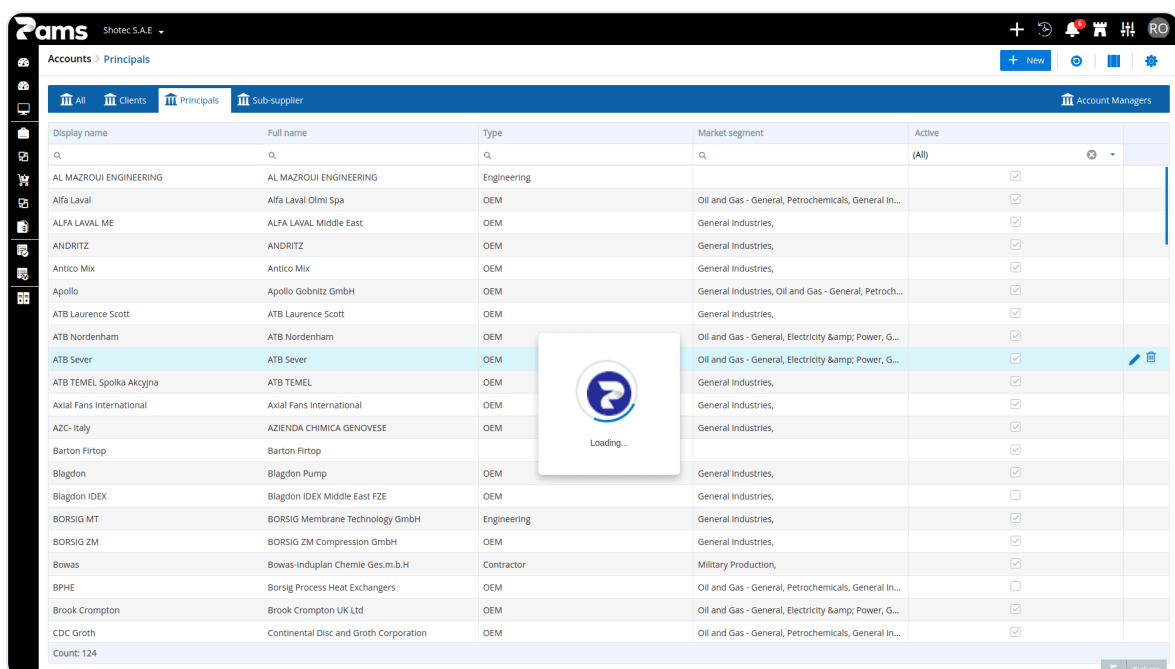

1. Open **Applications > Market** and review the consolidated Market list. Select the appropriate tab for the records you need to review: **account managers**, **accounts**, **principals**, or **sub supplier**.

All

2. Decide whether you need to find a particular record or review the whole list.

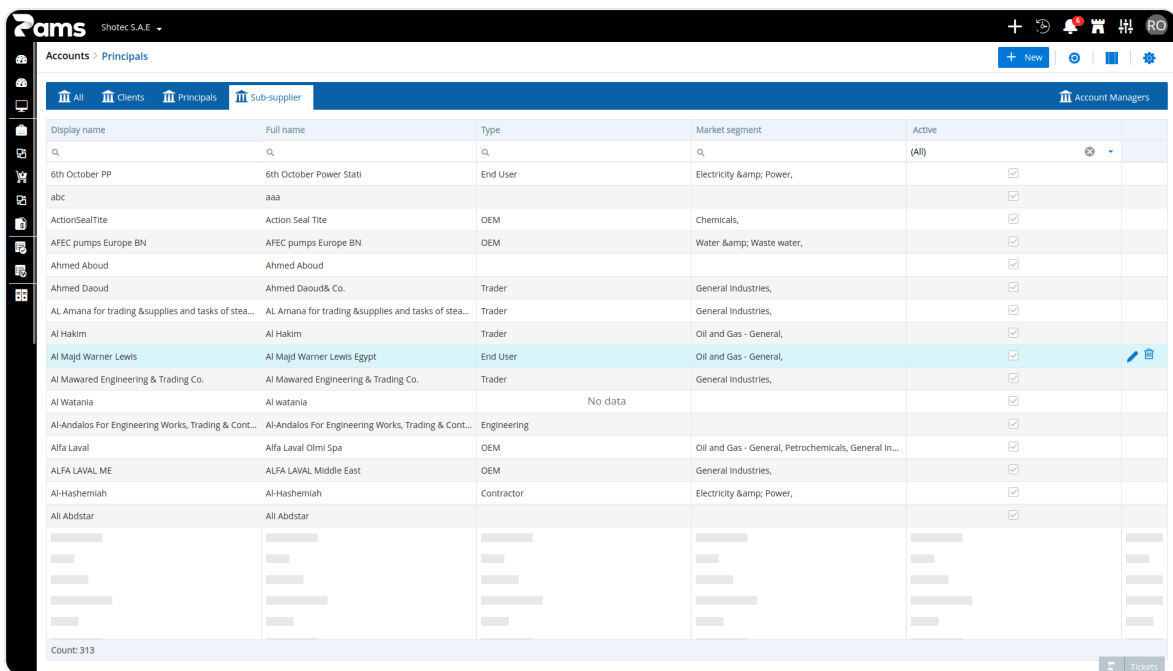

- To narrow the displayed list, enter your search text in **Search**.
- To adjust the information visible for the current review, select **Columns Chooser** and choose the list columns required for your task.
- Review the available columns, which may include display name, full name, type, market segment, and active status.

All

3. Decide whether the current list arrangement should remain temporary or be saved for reuse.

- For a temporary review, select **Standard Layout** when you want to return to the standard list presentation.
- For an existing saved arrangement, choose it in **Select...**
- To create a reusable arrangement, select **Add Layout**, enter a value in **Layout name**, and select **Save**.

The screenshot shows the Pams Accounts > Principals interface. The table displays a list of accounts with the following columns: Display name, Full name, Type, Market segment, and Active. The 'Active' column has a dropdown menu set to '(All)'. The table contains 13 rows of data, including accounts like '6th October PP', 'abc', 'ActionSealTitle', 'AFEC pumps Europe BN', 'Ahmed Aboud', 'Ahmed Daoud', 'Al Amana for trading &supplies and tasks of stea...', 'Al Hakim', 'Al Majd Warner Lewis', 'Al Mawared Engineering & Trading Co.', 'Al Watania', 'Al-Andalos For Engineering Works, Trading & Cont...', 'Alfa Laval', 'ALFA LAVAL ME', and 'Al-Hashemiah'. The 'Count: 313' is shown at the bottom left of the table.

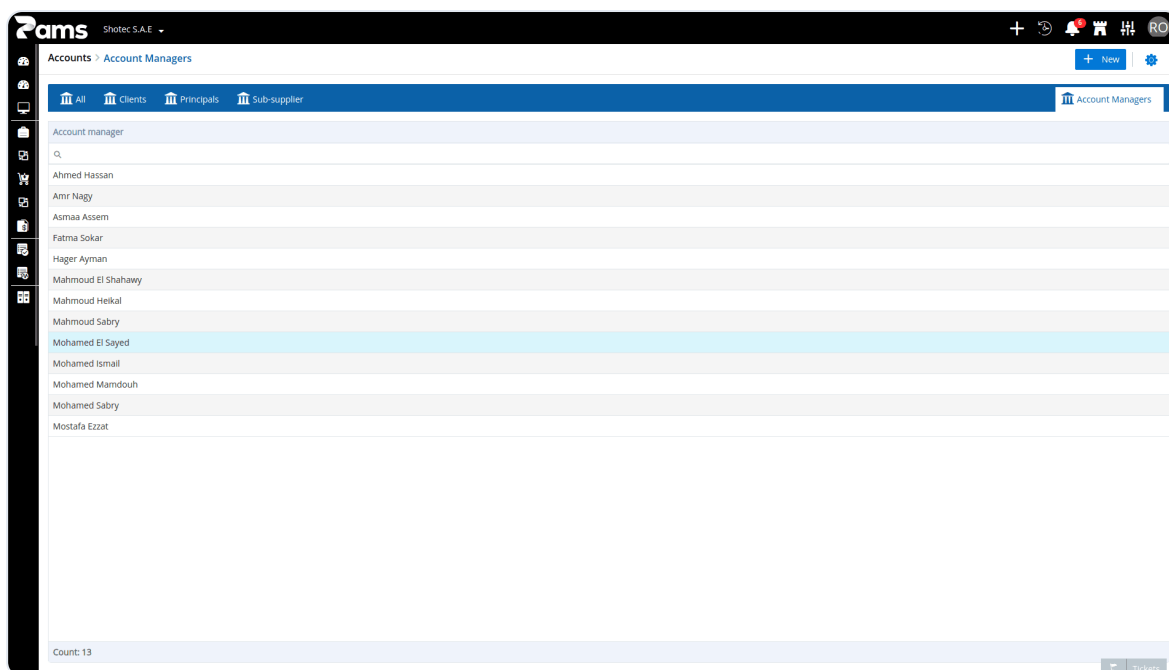

Display name	Full name	Type	Market segment	Active
6th October PP	6th October Power Stati	End User	Electricity & Power,	☒
abc	aaa			☒
ActionSealTitle	Action Seal Title	OEM	Chemicals,	☒

ALFA LAVAL ME	ALFA LAVAL Middle East	OEM	General Industries,	☒
Al-Hashemiah	Al-Hashemiah	Contractor	Electricity & Power,	☒
Ali Abdstar	Ali Abdstar			☒

All

Tip: Create a separate layout when different reviews require different columns. For example, an account-focused layout can emphasize account identity and market segment, while a supplier-focused layout can emphasize supplier records.

4. Decide whether to retain, revise, or remove a saved layout.

- To retain changes to the selected layout, select **Update Current**.
- To abandon an action before saving it, select **Cancel**.
- To remove the selected saved layout, select **Delete Current**, then use **Delete** when confirmation is required.

All

- When the displayed tab, search result, and layout are ready for distribution or further analysis, select **Export**.

account managers

The **account managers** tab contains account manager records available in the Market workspace. Use this tab to review the displayed record information and locate a particular entry through **Search**. You can change the visible list columns with **Columns Chooser** or apply a saved arrangement through **Select...**

No on-screen action is provided on this view for moving a record into or out of the **account managers** tab.

accounts

The **accounts** tab contains Accounts records, including customer, supplier, or other business-relationship organizations. Review the list using the available identity and classification information, such as display name, full name, type, market segment, and active status where shown.

No on-screen action is provided on this view for moving a record into or out of the **accounts** tab.

principals

The **principals** tab contains principal records in the Market workspace. Use **Search** to locate a known principal and use the list layout controls when you need a different presentation of the available record information.

No on-screen action is provided on this view for moving a record into or out of the **principals** tab.

sub supplier

The **sub supplier** tab contains sub-supplier records. This tab supports review of the records currently displayed and preparation of a list for export by using **Search**, **Columns Chooser**, and the available layout controls.

No on-screen action is provided on this view for moving a record into or out of the **sub supplier** tab.

Examples

A purchasing officer needs a reusable view of sub-suppliers for a Buyout review.

1. Open the **sub supplier** tab.
2. Enter the known sub-supplier name in **Search** to limit the list to the relevant record or records.
3. Select **Columns Chooser** and retain the columns needed for the review, such as display name, type, market segment, and active status where available.
4. Select **Add Layout**.
5. Enter **Buyout Sub-supplier Review** in **Layout name**.
6. Select **Save** to retain the layout.
7. When the purchasing officer needs the same view later, select **Buyout Sub-supplier Review** in **Select...**
8. After confirming the displayed records, select **Export** to produce an export from the current list view.

Warning: Select the correct tab before exporting. The export is initiated from the list currently being reviewed, so confirm that **accounts**, **principals**, or **sub supplier** is selected as required.

Tips

- **Tip:** Use **Standard Layout** when a saved layout no longer provides the information needed for a review.
- Keep layout names role-specific and purpose-specific to reduce confusion when selecting an arrangement from **Select...**
- Use **Update Current** only when you intend to change the selected saved layout for future use.
- Use **Export** only after confirming both the active tab and the search results.

Troubleshooting

Symptom	Likely cause	Fix
The expected record is not visible.	The wrong Market tab may be selected, or the current search text may exclude the record.	Select the appropriate tab and review or clear the value in Search .
The list does not show the information required for the review.	The current layout or visible column selection is not suitable.	Use Columns Chooser , select another layout in Select... , or return to Standard Layout .
Changes to a saved layout are not retained.	The layout changes may not have been saved.	Select Update Current for an existing layout, or use Save after creating a layout with Add Layout .
A layout was removed accidentally.	Delete Current was used for the selected layout.	Select Standard Layout or create a replacement layout using Add Layout and Save .
