User Guide › Reports

Reports Overview

The Reports area provides access to reporting content for reviewing business activity. It supports users who need to monitor operational information across sales, purchasing, warehouse, project, and finance processes.

Sales representatives, sales managers, purchasing officers, warehouse managers, project managers, and finance officers can use this area to open available report categories. The Reports page includes Tickets as an available reporting option.

What you can do here

- Open **Tickets** to access ticket-related reporting information.
