Administrator Guide Overview

Welcome to the Administrator Guide for Sherkety ERP & Website Platform. This section helps administrators understand the shared page patterns used across admin areas and website pages, so it is easier to move around, find actions, and stay oriented while managing daily work.

This overview is meant to help you know where to start. For step-by-step instructions, use the linked guides below.

What administrators can manage

In Sherkety ERP & Website Platform, administrators regularly work with pages that include lists, navigation paths, drawers, and repeated page controls. Understanding these shared patterns helps you:

- Move through long lists of records and catalog items
- Recognize where you are in deep page structures
- Use common page actions more confidently
- Understand how public-facing and admin pages follow similar layout rules
- Keep your place while browsing, filtering, or reviewing information

These guides focus on navigation and orientation across Sherkety ERP & Website Platform rather than on setting up a specific feature.

Admin categories

Shared Interface Patterns

This category covers reusable interface elements and interaction patterns that appear across website pages and admin pages in Sherkety ERP & Website Platform. It is especially useful for new administrators who want to become comfortable with how pages are organized and how common controls behave.

Available documents:

- [Using Pagination in Catalogs and Admin Lists](#)

Learn how to use pagination controls in ERP catalog and admin list views, including moving between pages and understanding displayed result ranges.

- [Understanding Breadcrumbs Drawers and Shared Navigation Patterns](#)

Learn how breadcrumbs, navigation drawers, and shared navigation patterns work across the website and admin interface to help visitors, editors, and administrators stay oriented.

- [Understanding Shared Interface Patterns Across Public and Admin Pages](#)

Learn the recurring interface patterns shared across public and admin pages, including navigation cues, page controls, action placement, and common layout behaviors.

- [Using Pagination and List Navigation Patterns](#)

Learn how to navigate paginated catalog and admin lists, interpret result counts, move between pages, and keep your place while searching, sorting, and filtering.

- [Recognizing Breadcrumbs and Location Cues in Complex Pages](#)

Learn how to recognize breadcrumb trails and other page location cues across deep public and admin page structures so visitors, editors, and administrators can stay oriented.

Where to start

If you are new to Sherkety ERP & Website Platform, a good starting order is:

1. [Understanding Shared Interface Patterns Across Public and Admin Pages](#)
2. [Understanding Breadcrumbs Drawers and Shared Navigation Patterns](#)
3. [Using Pagination and List Navigation Patterns](#)

If you mainly work with long lists, catalogs, or record tables, also review [Using Pagination in Catalogs and Admin Lists](#).

If you often move through nested sections or detailed records, read [Recognizing Breadcrumbs and Location Cues in Complex Pages](#).

How to use this guide

Use this Administrator Guide section when you want to understand how Sherkety ERP & Website Platform is organized across pages. These articles are helpful before

learning feature-specific tasks, because they explain the repeated patterns you will see throughout the admin experience.
