

What is Sherkety ERP & Website Platform

August 25, 2026

What is Sherkety ERP & Website Platform?

Sherkety ERP & Website Platform is a connected business website and management workspace.

For public visitors, Sherkety ERP & Website Platform helps people learn about business services, compare offers, explore ERP products, read common questions, and contact the company. It brings together information about company registration, accounting services, startup packages, and ERP modules in one place.

For authorized users, Sherkety ERP & Website Platform also includes an admin area for managing website content and important business information. This allows teams to keep pages up to date, adjust pricing, manage service details, update search preview information, and control user access.

In simple terms, Sherkety ERP & Website Platform helps businesses do two things at once:

- present their services clearly to potential customers
- manage and update that public experience from one connected workspace

What problems does Sherkety ERP & Website Platform solve?

Sherkety ERP & Website Platform is designed to solve common business challenges such as:

- **Scattered information:** Visitors can find services, ERP modules, pricing, and contact options in one place.
- **Difficult comparisons:** Comparison sections help people understand package options and choose what fits them.
- **Slow content updates:** Authorized users can update pages, services, and key details without rebuilding the whole website.
- **Multilingual communication:** Content can be presented in more than one language for different audiences.

- **Disconnected sales journeys:** Visitors can move from learning about a service to requesting a demo, starting a trial, or contacting the company.
- **Limited admin control:** Administrators can manage settings, pricing, user access, and website details from the admin area.

Who uses Sherkety ERP & Website Platform?

Sherkety ERP & Website Platform supports several types of users:

- **Prospective ERP buyers** who want to review modules, compare options, and request a demo or trial
- **Business services visitors** who are exploring company registration, accounting services, startup support, and related offers
- **Content editors** who update multilingual website content and maintain page sections
- **Administrators** who manage services, settings, pricing, search preview details, and user accounts

What can visitors do on the public website?

Public visitors use Sherkety ERP & Website Platform to browse and evaluate what the business offers. This includes:

- moving through the website using menus, links, and footer navigation
- switching between available languages
- exploring homepage highlights, trust indicators, team information, and ecosystem content
- reviewing startup packages and value breakdowns
- reading about accounting services and company registration options
- browsing ERP apps and opening module pages
- comparing offers and learning what is included
- sending inquiries, requesting demos, starting trials, or contacting the company through available channels

If you want a guided introduction to the public experience, start with [Browsing the Sherkety Public Website](#), [Using Header Menus and Footer Links](#), and [Understanding Breadcrumbs and Page Location](#).

What ERP modules are available?

Sherkety ERP & Website Platform presents several ERP modules that visitors can explore before making a decision.

These include:

- **HR** for employee and people-related processes
See [Exploring HR Module Overview and Business Fit](#)
- **Inventory** for stock visibility, warehouse activity, and replenishment
See [Exploring Inventory Visibility and Warehouse Overview](#)
- **Sales & CRM** for managing leads, customer relationships, quotes, and sales flow
See [Exploring Sales and CRM Overview](#)
- **Reporting & Analytics** for dashboards, financial reporting, performance tracking, and shared insights

There is also a combined website and ERP offer for businesses that want both their public website and business management tools together.

What can authorized users do in the admin area?

Authorized users sign in to the admin area of Sherkety ERP & Website Platform to maintain the website and related business information.

Depending on their role, they may be able to:

- view dashboard information
- edit page content directly
- update multilingual content
- manage services and service summaries
- maintain pricing tiers and package details
- update search preview information for pages
- adjust site-wide settings
- manage user accounts and access levels

Sherkety ERP & Website Platform also includes everyday usability features such as notifications, theme switching, page navigation tools, date selection, and quick search for actions.

Where should a new user start?

If you are completely new to Sherkety ERP & Website Platform, a good starting path is:

1. [Browsing the Sherkety Public Website](#)
2. [Understanding the Homepage Hero and Primary Actions](#)
3. [Exploring Homepage Promotions and Trust Content](#)
4. [Reviewing Startup Package and Value Sections](#)
5. the module overview that matches your interest, such as HR, Inventory, or Sales & CRM

To better understand the homepage highlights, you can also read [Viewing Team and Ecosystem Highlights](#).
