Who Uses Sherkety ERP & Website Platform

Sherkety ERP & Website Platform is used by both public visitors and authorized team members. Some people come to explore services and compare options. Others sign in to manage website content, pricing, settings, and user access.

This page helps you understand the main user groups, what they usually do, and which areas of Sherkety ERP & Website Platform matter most to them.

Prospective ERP Buyer

A Prospective ERP Buyer is usually a business owner, manager, or decision-maker who wants to understand whether Sherkety ERP & Website Platform is a good fit for their company.

Their main responsibilities are to:

- review available ERP modules
- compare options and pricing
- understand business benefits
- request a demo or start a trial

They often use these parts of Sherkety ERP & Website Platform:

- **ERP Apps Catalog** to browse available apps
- **HR Module Landing Page** to review people and attendance workflows
- **Inventory Module Landing Page** to understand stock and warehouse management
- **Sales & CRM Module Landing Page** to explore lead tracking, quotes, and customer follow-up
- **Reporting & Analytics Module Landing Page** to see dashboards, reports, and performance tracking
- **Website & ERP Package Landing Page** to compare combined offerings
- **Contact and Inquiry** areas to ask questions or request next steps

- **Comparison Sections** to compare plans, layouts, and recommended options

Business Services Visitor

A Business Services Visitor is someone exploring support services beyond ERP. This may include company registration, accounting services, startup support, and related guidance.

Their main responsibilities are to:

- learn about available business services
- compare service options
- understand company setup choices
- contact Sherkey for advice or pricing

They often use these parts of Sherkey ERP & Website Platform:

- **Public Website Navigation** to move between services and information pages
- **Services Section and Services Dropdown** to discover available services
- **Accounting Services Page** to review packages and compliance support
- **Company Types and Informational Pages** to compare registration options
- **Startup Package Spotlight** and **Startup Value Breakdown** to understand package value
- **Homepage Hero, Trust Indicators, and Sherkey Ecosystem Section** to understand the overall offer
- **FAQ and Legal Pages** for common questions and policy information
- **Footer Navigation, Social Media Links, and Contact and Inquiry** for follow-up

Content Editor

A Content Editor is an authorized user who keeps website content accurate, clear, and up to date across languages. This person focuses on what visitors see on public pages.

Their main responsibilities are to:

- update page text and section content
- maintain multilingual content
- review homepage sections and service descriptions
- make sure public information stays current

They often use these parts of Sherkey ERP & Website Platform:

- **Admin Authentication** to sign in securely
- **Admin Dashboard** to reach editing and management areas
- **Inline Content Editing** to update content directly from page sections
- **Content Editor Modal and Live Preview** to edit and review changes before saving
- **Localized Page Content Management** to maintain titles, descriptions, statistics, and language variations
- **Services Management** to update service summaries and details
- **SEO Metadata Management** when page titles and descriptions need maintenance
- **Language Switching and Multilingual Browsing** to check how content appears in each language

Content Editors may also use common tools such as **Breadcrumb Navigation**, **In-App Notifications**, and **Command Palette** to move around more easily.

Administrator

An Administrator is a privileged user responsible for wider control of Sherkety ERP & Website Platform. This role supports both the public website and the admin area.

Their main responsibilities are to:

- manage user access
- maintain services, pricing, and settings
- update search visibility details
- oversee important website configuration

They often use these parts of Sherkety ERP & Website Platform:

- **Admin Authentication** and **Admin Dashboard**
- **User Management** to control who can access admin features
- **Services Management** to maintain service listings
- **Pricing Tiers Management** to keep package and pricing information current
- **SEO Metadata Management** to manage page search details
- **Site Settings** to maintain site-wide information
- **Homepage Migration Tool** when homepage migration-related work is needed

Administrators also work with general interface tools such as **Pagination**, **Calendar Date Picker**, **Drawer Panels and Dialogs**, **Theme Switching**, and **In-App Notifications**.

Shared Experience Across Roles

Some parts of Sherkety ERP & Website Platform are useful to many users, even if their goals are different. These include:

- **Language Switching and Multilingual Browsing**
- **Breadcrumb Navigation**
- **Theme Switching**
- **Loading, Error, and Placeholder States**
- **Charts and Visual Indicators**
- **Contact and Inquiry**

If you are just getting started, begin with the role that best matches what you need to do in Sherkety ERP & Website Platform, then open the linked guides for step-by-step help.
